

A black and white photograph of five Majestic timpani drums arranged in a row, receding into the background. The drums have a textured, metallic body and white drumheads. They are mounted on stands with adjustable legs and pedals. The background is dark and out of focus, suggesting a stage or concert hall setting.

DR. BRIAN MASON

Professor of Percussion Morehead State

“The rich sound of Majestic timpani adds dimension and depth to orchestral, band, and percussion ensemble performance.”

majestic

TEMPS

THE Majestic **Opus One** series of orchestral snare drums seamlessly combine classically inspired design elements with a carefully curated assortment of shell sizes, bearing edge refinements and select shell materials to create a family of instruments perfectly suited for orchestral stages, modern percussion ensembles, solo performances, and a variety of audition environments. Born of extensive research of prized heirloom instruments heard regularly in some of the finest symphony halls around the world, these drums faithfully recreate these coveted sound profiles while simultaneously offering the benefit of modern advancements in tuning stability, versatility and dynamic range.

FEATURES

THE OP-01 STRAINER

The smooth and silent OP-01 strainer is a simple and classic functional design featuring a laser-engraved knurled vertical fine tuner adjustment.

INTEGRATED BRIDGE

The integrated bridge sets the optimal angle allowing the snare cables to establish a true and consistent point of contact with the resonate side head. The result is extreme responsiveness at all dynamic levels and playing areas of the drum.

I LUGS

To achieve a classic and elegant look as well as maximum shell resonance, the Opus One series drums feature the chrome plated "I" lug.

CLAW HOOK

The revolutionary "Rigid-Cast" claw hook design utilizes an oblong receiver hole enclosed in a diecast housing which prevents cracking, ensures proper tuning alignment, and allows flexible tolerance for both synthetic and natural heads.

HYBRID SNARES

Each model features its own unique set of hybrid or single-type snare cables in order to maximize the sensitivity of the instrument with which they are paired.

HEAD SELECTION AND DRUMDIAL™ OPTIMIZATION

Each model comes with specific head combinations and specific Drumdial tuning suggestions through extensive testing and collaboration with world renowned artists.

OPUS ONE SERIES

CHERRY WOOD

WARM & VINTAGE

Combining some of the most desirable qualities of the commonly used tone woods, cherry accentuates projection while maintaining an abundantly warm and round timbre. Applying this material to a pair of opposing shell sizes provides instruments capable of delivering that tonal warmth across the entire spectrum of pitch and dynamic sensitivity.

MOS1465PB

See page 51 for snare stand information.

BRASS

BRIGHT & CLASSIC

Dating back more than a century, brass has been a preferred snare drum shell material providing extreme clarity and performance in a variety of musical settings. The antique nickel brushed finish over a 1.2mm brass shell exudes understated elegance while facilitating desirable tonality and sensitivity throughout the extremities of dynamic range.

CAST IRON

RICH & SONOROUS

Harkening the famed “sewer pipe” drums coveted by top orchestral players, this concept has been modernized to offer range and projection suitable for the most dynamically demanding musical passages. Pairing the formidable 6.35mm Seamless Cast Iron Shell with die-cast hoops, this instrument yields unparalleled focus, extreme sensitivity, and undeniably unique tone.

ACCESSORIES

SNARE CABLE SETS

The Opus One series snare cable sets represent an innovative approach in design for Majestic®. Through careful selection of material type, gauge, and precise tensioning within each set, they provide superior sensitivity while maintaining consistent timbre throughout all dynamic ranges. The unique state of balance and harmony created when utilizing these cables both enhances and emphasizes the natural sonic characteristics of the instrument.

FREQUENCY MODIFIERS

Frequency Modifiers are accessories crafted from select materials and intended to allow performers to quickly modify the snare drum's tone. Extensively tested and tailored using the most suitable materials, shapes, and weights as to not muffle desirable frequencies or stifle the drum's response but rather allow the player to enhance and expand the pallet of sounds available.

FEATURES & BENEFITS

- Special PVC material, designed to enhance the drum's sound for specific applications.
- Slip-on Clip for easy and stable attachment to the drum hoop. With laser engraved Majestic logo and model identification.
- Suitable for any 14" diameter drum.

PROPHONIC SERIES

SNARE WIRE

Tailor to your discriminating taste with endless combinations of snare textures. Choose from 11 unique snare varieties, exclusive to the Prophonic Series.

1 Strand Wooden Beads
Dark and heavy. Produces an unconventional boxiness and warmth.
HK1

2 Strand Red Glass Beads
Uniquely dark and distant with a distinctive retro lo-fi limited frequency response.
RK2

4 Strand Phosphor Bronze Wound
Responsive with a wide frequency spread. Wet, yet dark.
9PGS4

4 Strand Thick Synthetic Gut
Deep, heavy, and earthy. Responds very well when played at louder dynamic levels.
TSN4

6 Strand Medium Uncoated Stainless Steel Cable
Very dynamic and sensitive response. Slightly edgy and dry overall tone.
06STS6

6 Strand Thin Nickel Wound
Extremely responsive and slightly wispy. Very clear and articulate at softer dynamics.
NGS6

6 Strand Black Cloth Cord
Extremely dry and controlled. Adds head-dampening characteristic when used in conjunction with other cables.
MS6

6 Strand Medium Black Coated Cable
Dark and articulate. A versatile choice.
MC6

8 Strand Black Coated Cable
Medium dry. Somewhat dark and quite articulate.
MC8

8 Strand Thick Stainless Steel Cable
Loud and heavy with a broad spread. Appropriate for ceremonial marches.
STS8

6 Strand Plated Steel Spiral Wire
Light and conventionally wet sounding.
SNM6

PEDRO FERNANDEZ

Indianapolis Symphony Orchestra

“My Prophonic Walnut Snare Drum sounds stunningly beautiful. Masterworks or Pops concert, this drum is Gold!”

CONCERT BLACK SERIES

An excellent choice for any level of performance, the Concert Black Snare Drums are well suited for all genres and applications. The combination of blue coated and braided steel cables yield a premium sound at all dynamic levels.
